

COMMUNITY CHURCH WEBSITE

This is a simple, informative website created to represent a Community Church. It's a basic web project made with HTML and CSS, showing different types of content related to the church. It's designed to be easy to navigate and useful for people who want to learn about the church, its activities.

the Website Includes:

✓ Home Page – Welcomes visitors and gives a short message about the church.

📖 Services Page – Shows the services or activities offered by the church.

📅 Events Page – Shares upcoming events or programs.

🖼️ Gallery Page – Displays pictures related to the church.

📞 Contact Page – Gives contact information so people can reach the church.

Technical Tools Used

HTML: Used to build the structure of the webpages.

CSS: Used to style the elements like colors, fonts, layout, and spacing.

GitHub Pages: Used to host the website online at:

Built With:

HTML – for creating the structure of the website

CSS – for styling and making the website look nice.

Purpose of This Website

To showcase your web development skills using HTML and CSS.

To provide a sample church website that can be used for real or school purposes.

To offer basic information about the church in a clean, easy-to-read format.

 **Who Made It:**

This project was designed and coded by **Robert Niyoyita**

It's a good example of your learning in Information Systems and web design
